INFORMATION DISCLOSURE STATEMENT
UNDER 37 CFR §1.56

Mail Stop Amendment
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Submitted herewith on Form PTO/SB/08 is a listing of documents known to Applicants in order to comply with Applicants' duty of disclosure pursuant to 37 CFR §1.56.

A copy of each non-U.S. patent document and each non-patent document is being submitted to comply with the provisions of 37 CFR §1.97 and §1.98.

The submission of any document herewith, which is not a statutory bar, is not intended as an admission that such document constitutes prior art against the claims of the present application or that such document is considered material to patentability as defined in 37 CFR §1.56(b). Applicants do not waive any rights to take any action which would be appropriate to antedate or otherwise remove as a competent reference any document which is determined to be a *prima facie* art reference against the claims of the present application.

TIMING OF THE DISCLOSURE

The listed documents are being submitted in compliance with 37 CFR §1.97(c), before the mailing date of either a final action under 37 CFR §1.113, a notice of allowance under 37 CFR §1.311, or an action that otherwise closes prosecution in the application.

RELEVANCE OF EACH DOCUMENT

Documents A1-A4 on the attached PTO/SB/08 were cited as being relevant during the prosecution of a counterpart Japanese patent application. An English translation of the foreign-language documents is not readily available. However, the absence of such translation does not relieve the PTO from its duty to consider the submitted foreign language documents (37 CFR §1.98 and MPEP §609). English language abstracts of the foreign language documents are provided for the Examiner's convenience.

A translation of a portion of a Japanese Office Action that issued November 30, 2004, with respect to a counterpart Japanese patent application, is provided below:

- Claims 1, 2, 3, 4, 5 and 8
- Reference 1
- Remarks
Reference 1 (Paragraph 0038-0044) discloses an invention of catalytic converter, comprising HC absorption layer and at least two catalytic layers formed thereon, wherein the amount of noble metal contained in the outer layer of the catalytic layer is greater than that of the inner layer.
- Claims 6 and 7
- References 1 and 2
- Remarks
In addition to the above-cited remarks regarding Claims 1-5, Reference 2 (mainly Chart 1) discloses that the noble metal contained in the outer-most layer is Pd and that the composition of the lowest layer is a random combination of Pt, Pd, and Rh. Further, Reference 3 (Paragraph 0063)

teaches that the amount of the promoter present in the outer layer is smaller than that of the lower layer.
